

Our innovations really **work for you.**

From big ideas to the smallest details.

You'll find the results of our fresh thinking in game-changing breakthroughs. For example, the one-click termination of P&S PlugTail™ Wiring Devices, which slash installation time. Or our invention of the GFCI receptacle.

You can also find our ideas working for you in many smaller innovations. Such as integrated, energy-saving LED nightlights in many P&S Combination Devices. The modular wall plate components included with P&S Titan™ Commercial Dimmers — no costly custom plates. And the industry's broadest line of tamper-resistant receptacles.

P&S ideas add up to more productivity and competitiveness for you. And more value for your customers. See for yourself at your nearby P&S distributor.
